This bill provides that the owner or operator of an existing range may repair, remodel, or reinforce any building on the range for the purpose of public safety or to ensure continued use of the building. The bill also specifies that the owner or operator may reconstruct, repair, or rebuild a building on the range that is damaged by certain natural causes if the damage occurs after the bill's effective date. The bill also allows the owner to expand the membership or facilities of the range, and allow sport shooting activities that are consistent with generally accepted operation practices for those activities.

This bill also prohibits a state agency, political subdivision, or court from requiring the closure of an existing range unless the state agency, political subdivision, or court finds that the range presents a public safety hazard to the surrounding community and the owner is given at least three opportunities to eliminate the hazard. The state agency, political subdivision, or court must also allow the owner of the range to relocate the range to any property where the operation of a sport shooting range is an allowable use of the property. If the the owner relocates the range as required by a state agency or political subdivision, the state agency or political subdivision must acquire the property by condemnation unless the state agency does not have condemnation authority. In that case, the state agency must purchase the range in the amount stated on an appraisal furnished by the owner of the range.
